## Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

US\_cipkop@gsk.com

## Advisory Action Before the Filing of an Appeal Brief

Application No.	Applicant(s)		
10/591,062	EBNER ET AL.		
Examiner	Art Unit		
ROBERT DYE	1791		

	ROBERT DYE	1791					
The MAILING DATE of this communication appe	ars on the cover sheet with the c	orrespondence add	ress				
THE REPLY FILED 08 September 2009 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.							
1.  The reply was filed after a final rejection, but prior to or on application, applicant must timely file one of the following application in condition for allowance; (2) a Notice of Appelor Continued Examination (RCE) in compliance with 37 Coperiods:	replies: (1) an amendment, affidavit eal (with appeal fee) in compliance v	t, or other evidence, w with 37 CFR 41.31; or	hich places the (3) a Request				
<ul> <li>a) The period for reply expires 3 months from the mailing date of the final rejection.</li> <li>b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.</li> </ul>							
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).							
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
NOTICE OF APPEAL  2. The Notice of Appeal was filed on A brief in comp filing the Notice of Appeal (37 CFR 41.37(a)), or any exter Notice of Appeal has been filed, any reply must be filed with the statement of the statem	nsion thereof (37 CFR 41.37(e)), to	avoid dismissal of the					
<u>AMENDMENTS</u>	·	, ,					
3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because  (a) They raise new issues that would require further consideration and/or search (see NOTE below);  (b) They raise the issue of new matter (see NOTE below);							
(c) They are not deemed to place the application in bet appeal; and/or	ter form for appeal by materially rec		ne issues for				
(d) They present additional claims without canceling a c		ected claims.					
NOTE: <u>See Continuation Sheet</u> . (See 37 CFR 1.1	• • •	!'	OTOL 204)				
4. The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).							
<ul> <li>5. Applicant's reply has overcome the following rejection(s):</li> <li>6. Newly proposed or amended claim(s) would be all non-allowable claim(s).</li> </ul>		imely filed amendmer	nt canceling the				
7.  For purposes of appeal, the proposed amendment(s): a) [ how the new or amended claims would be rejected is prov. The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected:		be entered and an e	xplanation of				
Claim(s) withdrawn from consideration:							
<ul> <li>AFFIDAVIT OR OTHER EVIDENCE</li> <li>The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good and was not earlier presented. See 37 CFR 1.116(e).</li> </ul>							
<ol> <li>The affidavit or other evidence filed after the date of filing entered because the affidavit or other evidence failed to o showing a good and sufficient reasons why it is necessary</li> </ol>	vercome <u>all</u> rejections under appea and was not earlier presented. Se	ll and/or appellant fail ee 37 CFR 41.33(d)(1	s to provide a ).				
10. ☐ The affidavit or other evidence is entered. An explanation REQUEST FOR RECONSIDERATION/OTHER	n of the status of the claims after er	ntry is below or attach	ed.				
<ol> <li>The request for reconsideration has been considered but <u>See Continuation Sheet.</u></li> </ol>		condition for allowan	ce because:				
<ul> <li>12. ☐ Note the attached Information <i>Disclosure Statement</i>(s). (</li> <li>13. ☐ Other:</li> </ul>	PTO/SB/08) Paper No(s)						
/Joseph S. Del Sole/ Supervisory Patent Examiner, Art Unit 1791	/R. D./						

Continuation of 3. NOTE: Amendments to claim 1 and 5 recite new limitations with regards to the specific location of the secondary split line such that said split line is now required to intersect with the parts of the mold cavity which define the ribs and allows for air trapped by the elastomer material as it flows from transversely opposite parts of the mold cavity.

Continuation of 11. does NOT place the application in condition for allowance because: Regarding the arguments presented, the applicant asserts that Davies teaches that the elastomer material is directed through the plastic material of the brush contrary to the applicant's invention which directs material over the surface of the pre-formed plastic part. Examiner wishes to point out that Davies further states that the elastomer can be directed by way of channels through the brush or "by visibly present channels on the brush surface". Thus, Davies does suggest inject elastomer on the brush surface.

Regarding the problem of trapped air within the mold cavity during injection filling, such is a well recognized problem in injection mold design since an injection mold cavity requires an air vent to allow resident gases to escape during mold filling. Furthermore, Steinebrunner recognizes the need to provide air venting in a toothbrush injection mold in his discussion of providing an appropriate path for hot gas to escape during injection. Although Britz is directed towards a slow, pouring mold, Britz does address the same problem of providing adequate mold ventilation by providing multiple split lines. Regarding the specific placement of the secondary split lines in relation to the intricate ribs, such is considered an introduction of new issues which require further search and consideration as noted above.
